SUMMARY

Frontend Engineer with 4+ years of experience building scalable, high-performance web applications using React, Next.js, and TypeScript. Expertise in frontend architecture, performance optimization, and design systems, with proven impact on user retention, reliability, and revenue.

TECHNICAL SKILLS

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, HTML5, CSS3, Storybook
UI/UX	Figma, Adobe XD, Miro, Responsive Design, Accessibility (WCAG)
Backend & APIs	Node.js, REST APIs, JSON, Microservices, Authentication (JWT)
Testing	Playwright, Jest, React Testing Library
AI & Dev Tools	Cursor, Claude, ChatGPT, Gemini (AI-assisted coding, debugging, test generation)
Tools	Git, VS Code, Splunk, Jira, Rally
Methodologies	CI/CD, Agile (Scrum), Code Reviews, Modular Architecture

WORK EXPERIENCE

Lead Software Engineer **Jan 2022 - Present**

Persistent Systems Ltd. *Pune, MH*

- Architected a Storybook-based design system, reducing UI duplication by 20% and accelerating feature delivery by 30%.
- Led frontend modernization using React and Next.js, improving Lighthouse score (65 → 94) and reducing load time by 40%.
- Optimized API orchestration using React Query and TypeScript, reducing payload size by 20%.
- Implemented lazy loading and code-splitting, improving Core Web Vitals and performance across high-traffic flows.
- Built and scaled Playwright-based E2E testing integrated with CI/CD, reducing regression issues and improving release reliability.
- Collaborated with product, design, and backend teams to deliver accessible, responsive, and scalable UI systems.
- Leveraged AI tools for code generation, debugging, and E2E test creation, improving development efficiency.

PROJECTS

QuickBooks Online (QBO)

(Intuit)

- Built a multi-step cancellation workflow (confirmation, callback, discount offers, feedback) for QuickBooks Online, reducing cancellations by ~20%.
- Contributed to retention initiatives driving $100M+ revenue impact through UX optimization.
- Enhanced Item Receipt and Manufacturing Order modules, improving usability and state handling with Redux.
- Developed 150+ Playwright E2E test cases, reducing regression bugs by ~20-25%.
- Implemented lazy loading and performance optimizations for high-traffic user flows.
- Built region-specific experiences (e.g., Philippines) for localized retention strategies.

Medication Consent Opt-In/Out System

(Optum)

- Built a secure consent management system using Go, React, and RESTful APIs, allowing users to opt-in/out of displaying full medication names in email communications for home delivery medications.
- Designed time-sensitive token-based authentication, handling 100k+ users securely and efficiently.
- Reduced API failure rates by 15% through robust error handling and validation mechanisms.
- Integrated Adobe Analytics for user interaction tracking, enabling data-driven decisions.

Skyline Academy Revamp

(Optum)

- Led UI revamp of an enterprise learning platform using React and Storybook, delivering 50+ reusable

components for scalable development
- Built an interactive component sandbox, improving developer productivity by 15% and enabling faster UI iteration
- Authored standardized component documentation, reducing onboarding time by 40% and improving cross-team consistency
- Enhanced navigation and UX flows, increasing user engagement and usability across the platform

Organization Changes Management (OCM) Platform Enhancement
(Optum)

- Automated workflows using Camunda, reducing manual effort by 25%.
- Improved workflow accuracy by 20% and reduced issue handling time by 15%.
- Built dashboards to enhance operational visibility and efficiency.

EDUCATION

- **Bachelor of Technology in Computer Science** — **Aug. 2018– June 2022**
  Deogiri Institute of Engineering and Management Studies — *Chh.Sambhajinagar, MH*

CERTIFICATION

- Google Cloud Certified: Generative AI Leader
- Microsoft Certified: Azure Fundamentals (AZ- 900)
- Java Full stack (React) Certification
- Python Certification
- GitHub Copilot
